

EcoplastTM

General characteristics of our film **EcoplastTM** :

- Coextruded film, 5 layers blown, manufactured through new generation industrial tools.
- Has excellent mechanical strength (puncture and tear resistant).
- Has an excellent behaviour; bi-oriented design ensuring greater enveloping force.
- Has a sticky side ensuring gas, water and air tightness.
- Has an optimum UV protection (12 months).
- Enables conservation of nutritional fodder.
- Has been tested successfully on wrappers stretching the film to 70%.

5-layer technology

UV protection 12 months (class A)

Eco-designed

Technical Specifications

Composition	PE + additives
Breaking stress	SL > 28 MPa / ST > 23 MPa
Elongation at break	SL > 400% / ST > 600 %
Dart Test	200 g
Tear	120 cN
Durability	12 months after implementation

Available in: **500 mm x 1800 m**
 750 mm x 1500 m

Our Commitments

This commercial document has no contractual value. The information and photographs contained therein are not binding except the appreciated technical specifications in accordance with the EN14932 standard.

Only our F.I.C.C.U: Information Sheet, Tips and User Instructions (product catalogue) and / or our specifications (specific products) determines the content and the limits of our commitments regarding the technical features of our products.
Our F.I.C.C.U. (Information Sheet, Tips and User Instructions) can be obtained from your supplier.

You can also contact us via the email address: agricole@barbiergroup.com or on our website www.barbiergroup.com

Our Recommendations

We recommend that before you order and use our films please:

- Read our Information Sheet, Tips and User Instructions.
- Discuss with your supplier our products for your specific operating conditions

When using coupled with net or twine

Minimum 4 layers on round bales (2 + 2)

Minimum 6 layers on square bales (2 + 2 + 2).

For special conditions in use, continuously wrapping on 3D or COMBI machines we recommend products from our HERITAGE or TITAN range
