Technical specifications

To comply with
the standard
NF EN 13207

		Method of test
Thickness	125µ	ISO4591 et ISO4593
Stress at break	SL>18Mpa / ST>18Mpa	EN ISO 527-1
Elongation at break	SL>450%/ST>600%	EN ISO 527-3
Dart Test	450g on film 150 g on fold	EN ISO7765-1 : 2004 Method A
Durability	12 months classe S1 (≤ 130Kly)	§7.6 EN13207

Our Engagements

La présente fiche commerciale n'a pas de valeur contractuelle. Les informations et photographies qu'elle contient ne nous engagent pas à l'exception des spécifications techniques appréciées conformément à la norme EN13207.

Only our F.I.C.C.U. : Information Sheet, Advice and Instructions for Use (catalog products) and / or our specifications (specific products) determines the content and limits of our commitments concerning the technical characteristics of our products.

Our F.I.C.C.C.U. (Information Sheet, Tips and Instructions for Use) can be obtained from your supplier.

You can also contact us to get it to the email address : agricole@barbiergroup.com or on our website www.barbiergroup.com

Our Recommendations

We recommend that before you order and use our film:

- without having read our Information Sheet, Tips and Instructions for Use.
- without having discussed with your supplier our product and the particular conditions of your operation.

Ballasting with used tires is prohibited, use weighting bags provided for this purpose.

The use of **Ensil Premium™** for the protection of a straw stock is to be avoided. Please contact your distributor to determine the best way to respond to this use.

Serving the agricultural sector for more than 60 years, the BARBIER group offers a complete range of films specialized in plasticulture at the cutting edge of technology.

The BARBIER group is today the first French and one of the European leaders.

The BARBIER group works in close collaboration with the official institutes (INRA, CEMAGREF, CTIFL, test stations, agricultural chambers, ...).
